

## **What are we working on in your neighborhood?**

- We're working with the Chelan Douglas Land Trust to create a trailhead on Lower Castlerock. They have purchased property and the City is pursuing a grant for trailhead construction which could occur in 2015-2016 if successful.
- We're planning for sidewalk and intersection improvements from Western and Cherry up #2 Canyon Road
- We are chip sealing, restriping and removing parking along Miller Street
- We're planning a number of improvements at Washington Park:
  - Riverview Kiwanis is working to update and replace the picnic shelter
  - Rotary Club completed a sidewalk extension to the restrooms
  - The City is seeking grant funds to create a multi-use sport court in the park, as well as a combination tennis/pickleball court, and new trees
- We're considering a school zone camera for Washington Street
- We'll be carrying out a planning process to look at secondary access issues for Western Wenatchee above Western from Castlerock to the northern City limits
- We're working on providing information on neighborhood fire safety in light of last year's fires
- We'll be providing information on the benefits of being annexed into the City to receive sewer service, enhanced garbage service and a chance to participate in the future of the City!
- We're working on an upgrade of Chase Park including new play equipment, accessible routes of travel, historic themed light fixtures, picnic amenities and street trees
- The City has adopted the Regional Bike Plan and a number of bike routes are planned for the central area of the City
